## PROFESSIONAL SUMMARY

.NET Full Stack Developer with 2+ years building ASP.NET Core Web APIs, Azure-hosted services and React front-ends for insurance, fintech and CRM platforms, including legacy SOAP/WCF and BizTalk integration. Strong in C#, EF Core, SQL Server tuning and CQRS, with regular use of AI tooling (GitHub Copilot, Semantic Kernel) to ship faster. On a motor-claims platform handling 10,000+ claims/year, helped cut report generation by 30%. Available immediately.

## PROFESSIONAL EXPERIENCE

### Software Developer (Remote)

Datamatics Global Services Limited

Jun 2025 - May 2026

Mumbai, Maharashtra

- Developed and maintained ASP.NET Core Web APIs, WebForms and Savvion BPM features for the Reliance Motor Claims platform across OD, Theft and PA claim types, handling 10,000+ claims a year from FNOL to garage settlement and payout.
- Built and consumed WCF/SOAP services on IIS to integrate multiple insurers, 50+ surveyor portals and 200+ garages, handling message contracts, routing and fault-tolerant error handling in the BizTalk layer for claim-status and survey updates.
- Built 6 scheduled Azure Functions to automate daily claims-reporting and reconciliation jobs for 200+ garages and surveyors; used GitHub Copilot and Claude for boilerplate, unit tests and refactoring, speeding up feature delivery by ~20%.
- Tuned high-volume SQL Server stored procedures and EF Core queries on the claims-reporting workload, adding indexes and rewriting heavy joins to achieve 30% faster report generation and 25% lower peak database load across daily reporting windows.

### Software Developer

Cylsys Software Solution Pvt. Ltd.

Jul 2024 - Mar 2025

Narsinghpur, M.P.

- Delivered 8 fiscal-year compliance forms for UTI Mutual Fund on ASP.NET Core MVC with Razor Pages, Dapper and PostgreSQL, building a year-based eligibility engine, role-based access (RBAC) and audit logging to meet UTI's regulatory requirements.
- Built and deployed 12+ RESTful Web APIs for the NuVama financial transactions platform, with a React approval dashboard, maker-checker-risk approval workflows and a SQL Server backend that held 99.5% uptime in production throughout the rollout.
- Implemented JWT authentication middleware, Serilog structured logging, health checks and xUnit tests across the core approval workflows, coordinating with QA and cross-functional teams while using GitHub Copilot and Claude.

### Software Developer Intern (Contract)

MKP IT Services Pvt. Ltd.

Dec 2023 - May 2024

Nagpur, Maharashtra

- Ramped up quickly on C#, ASP.NET Core and Entity Framework Core while building UI components and CRUD features for an internal CRM, working closely with senior developers on a React, Bootstrap and SQL Server stack, guided by regular code reviews.
- Built and tested REST API endpoints with JWT authentication and Swagger documentation, wrote and debugged SQL Server queries and stored procedures, and worked with EF Core, LINQ, code-first migrations and basic xUnit tests.
- Contributed across Agile ceremonies including sprint planning, daily standups and code reviews, and used Git branching, pull requests and GitHub Actions CI/CD while delivering small features and bug fixes independently within sprint timelines.

## TECHNICAL SKILLS

**Backend Development:** C#, ASP.NET Core, Web API, REST, MVC, WCF, SOAP, BizTalk, Entity Framework Core, Dapper, LINQ, async/await

**Frontend Development:** React, SignalR, JavaScript (ES6+), Bootstrap, jQuery, HTML5, CSS3, ASP.NET WebForms, Razor Pages

**Databases & ORM:** SQL Server, PostgreSQL, Azure SQL, T-SQL, Stored Procedures, Query Optimization

**Cloud & DevOps:** Azure (App Service, Functions, Service Bus, Blob Storage, APIM, DevOps), Docker, GitHub Actions, CI/CD

**Architecture & Integration:** SOLID, Clean Architecture, CQRS, MediatR, Dependency Injection, Repository Pattern, Microservices

**Testing & Security:** xUnit, JWT, OAuth 2.0, Swagger/OpenAPI, Postman, Serilog, Health Checks

**AI & Integration:** GitHub Copilot, Claude, Claude Code, Semantic Kernel, RAG, MCP, OpenAI API

## CLIENT PROJECTS

- Reliance Motor Claims Platform (Datamatics):** End-to-end motor-claims processing across OD, Theft and PA types, spanning 200+ garages and 50+ insurers from FNOL to payout. [ASP.NET Core Web API, WCF, BizTalk, Savvion BPM, Azure Functions, EF Core]
- UTI Compliance System (Cylsys):** 8 fiscal-year compliance forms with a year-based eligibility engine, role-based access, audit logging and validation rules for UTI Mutual Fund. [ASP.NET Core MVC, Razor Pages, Dapper, PostgreSQL, JWT, Serilog]
- Nuvama Financial Invocation System (Cylsys):** 12+ RESTful APIs powering a maker-checker-risk approval dashboard with audit trail and role-based access for high-value financial transactions. [ASP.NET Core Web API, React, SQL Server, JWT, xUnit, Health Checks]
- Perfect Pitch CRM (MKP):** Internal CRM with 5 modules, real-time SignalR notifications and a live pipeline-tracking dashboard, built with senior developers during early .NET training. [C#, .NET 6, ASP.NET Core, EF Core, React, SignalR, SQL Server]

## EDUCATION & CERTIFICATIONS

### B.Tech in Computer Science & Engineering (AI/ML Specialization)

Lovely Professional University

2019 - 2023

Phagwara, Punjab

**Certifications:** AZ-900: Azure Fundamentals (2025) | Microsoft Generative AI Certification (2025) | Advanced C# Development (Udemy)
